

Jose Maria Insenser

Contact for IPCEI.

AMETIC

Telecommunications Engineer from UPC, IESE's PADE (Senior Business Management Programme) and PhD in Economics and Innovation Management (DEGIN) from UCM, UAM and UPM.

Most of his professional activity has been developed in the field of Microelectronics. He worked for the R&D Department of Telefónica in chip design, and was the founder, CEO and President of Semiconductores, Investigación y Diseño, S. A. from 1992 to 2012. He is currently an independent strategy and innovation consultant in technology based companies and the Industrial Contact Point in Spain for the IPCEI (Important Projects of Common European Interest) on Microelectronics and Communications Technologies, proposed by AMETIC (the Multi-industry Association of Spanish Electronics and Communications Companies).
